Asia Simulation Conference is an annual simulation conference organized by Asian simulation societies – KSS (Korea Society for Simulation), CASS (Chinese Association for System Simulation), JSST (Japan Society for Simulation Technology), Singapore, and Malaysian Simulation Society (MSS). This conference provides a forum for scientist, academicians, and professionals from around the world to promote the advancement of modeling and simulation in industry, research and development. In this regard, the Federation of Asia Simulation Societies (ASIASIM) was formed in 2011. AsiaSim 2017 conference will be held in Melaka, Malaysia. Strategically located along the Straits of Malacca, Melaka was once the epicenter of an important trading empire which attracted thousands of traders from all over the world. Remnants of its long and illustrious past under the successive rule of the Portuguese, Dutch and British are well-preserved and can be still be seen today, earning it the prestigious title of ‘UNESCO World Heritage City’ in 2008.

Topics within the scope of the conference will include, but are not limited to:

Paper submission and publication: Please submit full papers through the conference website. All submitted papers should be in the form of .pdf file with the specified template as provided in the website. Accepted papers will be published by Springer, in the Communications in Computer and Information Science Series (CCIS). CCIS is abstracted/indexed in EI, DBLP, Google Scholar, Mathematical Reviews, SCImago, and Scopus. Papers will be considered for publication only if at least one of the authors is officially registered and present the paper in the conference.
